SUMMARY

Curious and self-driven frontend developer with a strong foundation in JavaScript, HTML, and CSS. Experienced in building interactive web applications with dynamic UI and persistent data handling. Currently focused on strengthening problem-solving skills and improving the ability to build applications independently through hands-on projects.

EDUCATION

Madhuben And Bhanubhai Patel Institute of Technology, CVM university, Anand

B.Tech in Computer Engineering

2023 – Present

PROJECTS

TaskMate – To-Do Web Application | Tech: HTML, CSS, JavaScript

- Built a task management application with add, delete, and toggle features
- Implemented localStorage to persist data across sessions
- Developed filtering system (All / Completed / Pending)
- Added inline task editing with dynamic UI updates
- Displayed real-time task statistics
- Implemented dark mode and smart empty states
- Used event delegation for handling dynamic elements efficiently

MetroSim – Metro System Monitoring Dashboard | Tech: React, TypeScript, Tailwind CSS

- Contributed to the development of a metro system monitoring dashboard
- Assisted in building UI components for network visualization and system status
- Explored component-based architecture and modern frontend tools
- Gained exposure to React and TypeScript through hands-on project work

GhostKeys – Biometric Authentication (Hackathon Project) | Tech: JavaScript, Browser APIs

- Contributed to web page development to support biometric authentication using keystroke and voice patterns
- Developed login interface and assisted in frontend implementation
- Participated in research and development of authentication workflow
- Collaborated in a team environment during a hackathon setting

UAble – Web-Based Learning Platform for Mute and Deaf Children | Tech: Python (Basic), Machine Learning

- Conceptualized an interactive learning system where students can learn Gujarati and English alphabets
- Designed engaging pre-loaded games to make the learning process interactive and enjoyable
- Included quiz-based assessments to help students test and reinforce their understanding

TECHNICAL SKILLS

Languages: JavaScript (Primary), Python (Basic)

Frontend: HTML, CSS, DOM Manipulation

Concepts: Event Handling, Local Storage, Basic OOP

Tools: Git, GitHub, Adobe Photoshop, Adobe Premiere Pro

ACHIEVEMENTS

2nd Runner-Up – Parul AI/ML Hackathon Secured ₹10,000 team prize

Participated – CVM Hackathon

Participated – IEEE Ideathon

POSITIONS OF RESPONSIBILITY

Coordinator – College Literature Club

Organized and managed literary events

Coordinated with team members to improve student participation

INTERESTS

Reading and exploring ideas, Traveling and exploring cities, Fitness and maintaining a healthy lifestyle, Photography (especially sunsets and landscapes), Creative editing using Photoshop and Premiere Pro
